NEW PRODUCT GUIDE

Hundreds of New Products. Infinite Possibilities.

Mini-Circuits has introduced hundreds of new products, growing some product lines by as much as 50% in 2020 alone! With our latest in-house designs from LTCCs and MMICs to connectorized amplifiers, test solutions and more, we continue to expand our portfolio for continuing development in the mmWave bands and solidify our position as the world's preferred supplier for the next generation of wireless applications.

Our Q3 new product guide gives you a snapshot of some of our latest catalog introductions just from the last few months. We hope you find this information helpful as you consider part selection for your next design. Remember, if you don't see what you need here, we offer THOUSANDS of models off the shelf and custom design capability with fast turnaround. Our applications engineers are ready to support your product selection efforts or discuss your special requirements for custom designs.

The World's Preferred Supplier of RF, Microwave and mmWave Products.

- ◆ Over 50 years of in-house design and manufacturing expertise
- ◆ Over 7,500 catalog components
- ◆ Custom turnaround as fast as 7 weeks
- ◆ EOL guarantee - support through the life of your system
- ◆ Accessible, engineer-to-engineer application support
- ◆ Global sales and distribution presence
- ◆ Award-winning quality and customer service
- ◆ Easy RMA process

Always Here to Support You

FILTERS

HIGHLIGHTS

- ▶ Integrated LTCC filter/baluns
- ▶ New LTCC filters with smaller size and higher rejection
- ▶ Reflectionless filters extend coverage up to 30 GHz
- ▶ New additions to suspended substrate lineup
- ▶ Cavity filters with expanded passband width

50Ω DC to 6000 MHz

Ceramic Resonator Bandpass Filter

- Low insertion loss with excellent power handling
- Low profile designs with min. height of 0.120"
- Excellent temperature stability
- Rugged construction

Free Full 3D Models for ANSYS HFSS®

Mini-Circuits has partnered with modelling and simulation leader, Modelithics to offer full 3D models for ANSYS HFSS for over 40 of

Mini-Circuits' most popular LTCC filters. The models are now available for FREE download from the Modelithics Website as a resource to customers in the simulation stage for new system designs. We are already planning further development of additional 3D models for HFSS on an ongoing basis, and we're thrilled to make our advanced modelling capability for LTCC parts available as an engineering resource to customers.

To learn more about 3D models for HFSS and other high-accuracy simulation models for Mini-Circuits parts from Modelithics, visit: <https://www.modelithics.com/mvp/minicircuits>

Mini-Circuits Expands Distribution through Mouser Expands to 206 Countries

We're very excited to announce the expansion of Mini-Circuits' distribution partnership with Mouser Electronics, Inc., making Mouser an authorized distributor of Mini-Circuits' product line in 206 countries. The two companies first announced their partnership in March with initial distribution in the U.S. and India. The expanded agreement will give more international customers the convenience and flexibility of ordering Mini-Circuits components through Mouser or directly through Mini-Circuits.
